SUSTAINABILITY

Here at Box Clever Events we have consciously put sustainability at the forefront of our Brand.

We have carefully sourced packaging from our suppliers, who themselves are striving to be as sustainable as possible. Most of our products are recycled already, can be re used, or can be recycled, or composted. We want to adopt the three R's in our brand. Reduce, Reuse and Recycle. We want to create a business that is committed to looking to the future and making us more sustainable and hopefully carbon neutral one day.

As for the product inside the lovely packaging...

We are aiming to use local produce for 90% of all our boxes, reducing air and land miles. We have also taken the conscious decision to not have any products containing Palm oil.

WE HAVE A FANTASTIC PARTNERSHIP WHERE FOR EVERY FIVE BOXES BOUGHT WE PLANT A TREE- with More trees www.moretrees.co/

There is no bigger issue than sustainability that our world faces right now and event suppliers are witnessing a new norm, event briefs with sustainability at the top of their criteria. We all need to work together to create a better future for our planet and the events industry needs to show that is it doing its part. We hope that all these small steps within our business will help towards saving our beautiful Planet.
